

Exercise - Test the application

10 minutes

In this exercise, you test the application that you built.

ⓘ Note

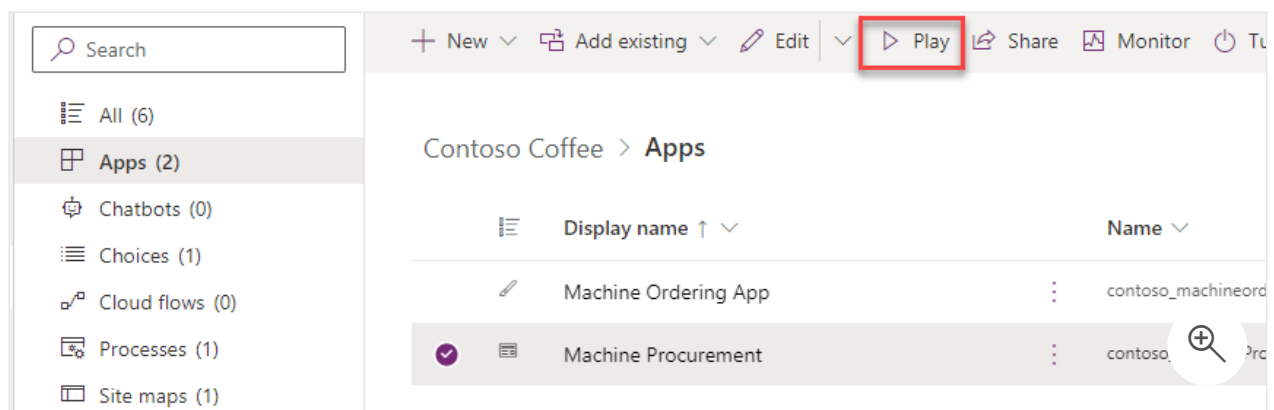

To complete the exercises, you'll need to use a few files. Download the **App in a Day files** for use in this module. The file folders that are in this download include:

- **Completed modules with instructions** - Package files to import the completed exercise steps.
- **Machine-Order-Data.xlsx** - File used in the exercises.

Task: Test the application

To test the application, follow these steps:

1. Select **Apps**, select the **Machine Procurement** application, and then select **Play**.

The application should start, and the **Active Machine Orders** view should load.

ⓘ Note

If your data doesn't show in the list, run the Machine Ordering canvas app that you built and then submit some orders.

2. Start a new web browser instance and then go to [Make Power Apps](#) . Don't close the model-driven application.
3. Select **Apps**, select the Machine Ordering application that you created in module 2, and then select **Play**.
4. Select two machines. Make sure that one of the machines is priced over \$10,000 and then select **Compare**.

Submit machine request

- Select **OK**. If you didn't choose to create the submission success screen in a previous module, this option won't exist. You need to complete steps 3 and 4 again and then move to step 8.

Machine Ordering
Hello, Lab Admin1

Your machine request has been successfully submitted. Thank you

Machine Name	Commercial Espresso Machines - Cafe Duo
Price	12900
Comments	
Approver	labadmin1@mayenviro.onmicrosoft.com
Requested By	labadmin1@mayenviro.onmicrosoft.com
Request Date	5/17/2022 12:00 AM

OK

- Select two more machines and then select **Compare**.
- Select a machine with a price under \$10,000. Provide an approver email (or leave in the auto-populated manager email) and then select **Submit**.

13. The business process flow for this order should have four stages because this order doesn't require **Capital Approval**.
